

# Jim Gruneisen

---

**Summary** A senior pilot with flight experience in a broad range of piston and turboprop aircraft. Past experience as a product development manager. Skilled in building and managing globally dispersed cross-functional teams. Experienced in developing partnerships with technology suppliers and translating customer needs into solutions. A highly ranked contributor with a unique mix of hardware and software experience.

**Professional Experience** Current Projects:  
Island Air Friday Harbor, WA  
**Charter pilot & Check Airman** 2006 - present  
Responsible for company VFR and IFR check rides and reporting to FAA. Air Ambulance pilot and Charter pilot certified for single pilot IFR operations in Cessna 172, 206, 207, and Beechcraft B200 King Air. Annually complete 3 FAA check rides and attend King Air B200 training at Flight Safety ProCard performance.

Bonanza/Baron Pilot Training Friday Harbor, WA  
**Treasurer, Lecturer, & Flight Instructor** 2012 - present  
Manage accounting, budgeting and payroll for a for profit corporation BPT, Inc [www.pbpt.org](http://www.pbpt.org) with annual revenues of \$400,000 that delivers type specific flight training throughout the Americas in 8 annual clinics. Develop and deliver ground school and flight instruct 3 pilots/clinic.

**Flight Instructor**  
Develop and deliver personalized flight instruction to private, commercial and flight instructors in private and rental aircraft.  
Beechcraft Pilot Proficiency Program Friday Harbor, WA

**Treasurer, Lecturer, & Flight Instructor** 2005 - 2012  
Manage accounting, budgeting and payroll for a not for profit with annual revenues of \$1 million that delivers type specific flight training throughout the Americas in 12 annual clinics. Develop and deliver ground school and flight instruct 3 pilots/clinic.

## Aircraft Experience

- Beechcraft – Baron 55/58/58P, Bonanza, King Air B200
- Cessna – 172, 182, 206, 207, 210, P210
- Pilatus – PC12
- Piper – Comanche, Warrior, Archer, Arrow, Saratoga
- Beechcraft Baron Owner

## Simulator Training

- Completed SimCom PC12 training 03/17/2000
- Multiengine training at Embry-Riddle, Dayton, FL 01/15/2006
- Annual Flight Safety King Air B200

### **Flight Hours (as of 1/19/2013)**

30 years of accident free flying and instruction experience throughout the continental US, Alaska, Canada and Mexico.

- Total Time – 6000+
- SEL – 2600
- MEL – 2400
- Flight Instructor – 2000
- Night – 300
- Actual Instrument – 170
- Last 90 Days - 50

FAA Pilot Certificate Number 3393769 issued 06/11/2003

- Multiengine Land ATP
- Single Engine Land Commercial
- Single Engine Sea Commercial

FAA Certified Flight Instructor Number 555826181CFI Expires 11/30/2014

- Single Engine Land
- Multiengine Land
- Instrument
- Advanced Ground Instructor

FAA Medical Certificate Second Class issued on 05/03/2012 by Dr Peter Brown, MD

Hewlett-Packard Company/Agilent Technologies Palo Alto, CA  
**Informatics & Infrastructure Manager** 2000 - 2005

- Joined Agilent's Life Sciences and Chemical Analysis (LSCA) Business Group as a Software R&D Manager responsible for DNA microarray products. Within six months, staffed a development team with over 20 new PhD and experienced workers in image processing, statistics, project manager, and computer scientists. Initiated the use of a software development lifecycle and Rational's requirement management tools. Developed the machine control, user interface and image processing software for the world's first high throughput microarray scanner in 2001. Built the infrastructure and staffed a project team to deliver custom probe design services.
- After follow-on releases of the scanner, joined the WorldWide Order Fulfillment organization as IT Infrastructure and eventually factory Quality manager. Currently manage the software development, support, hardware infrastructure, and business continuity plan for the 24x7 DNA Microarray manufacturing fab in Santa Clara. These applications consist of an MES system from Camstar, custom built QC software for processing QC arrays, and factory data analysis tools. These tools are built upon, Microsoft,

Oracle, Unix, and Linux tools. In addition to the IT systems, I managed the production quality organization and quality development team. Production quality consists of wet labs for hybridizing arrays, scanning, image processing and dispositioning product.

- Since joining the Life Sciences business unit, I've attended evening classes at UC Santa Cruz to complete a certificate in Bioinformatics. I'm one class away from completing the certificate with a GPA of 3.8. I attended the **New England Biolabs Molecular Biology Summer Workshop** at Smith College. See [http://www.science.smith.edu/neb/course\\_summary.html](http://www.science.smith.edu/neb/course_summary.html) for content.
- In addition to my assigned responsibilities, I've also completed numerous special assignments including customer presentations, executive contact for our largest customer, member of audit team, and employee mentoring. My performance ranking at Agilent is a 1, the highest possible.

### **Electronic Packaging R&D Manager**

1998 - 2000

Lead a team of other managers, engineers and scientists who develop the materials and assembly processes for Application Specific Integrated Circuits (ASICs). The material and assembly processes selected for an ASIC are critical because they make up 40 - 60% of the overall ASIC cost and limit electrical and thermal performance.

- Led a team that constantly created innovative approaches which pushed both high performance for microprocessors and low cost for printer applications.
- Integrated customer needs and emerging technology into a new silicon package development roadmap and business plan. Our largest customer stated in a supplier survey that electronic packaging would not meet their future needs. Following the completion of the new roadmap, their feedback changed to would meet their needs.
- Managed the development of an innovative ASIC assembly process and released to manufacturing. The patented design combines technology from several suppliers into a product that offers a superior thermal and electrical price performance ratio. Several customers have selected it for products that begin shipping in September.

- 

University of California

Davis, CA

### **Education**

**Bachelor of Science - Electrical Engineering**
